

LEAD OR DEAD (LOD)

Change Is Inevitable – Growth Is Intentional

OVERVIEW

Change is a constant in any company. Driven by high performance and quality, change can be the tailwind that propels us forward to growth and success, this depends, in large part, by the combination of leadership and functional skills far deeper in organizations than ever before.

The only way to stand out is to increase its value both as a person and as an organization.

Our strategy to change management involves helping other learn to lead and navigate through change.

It's a practical approach to embracing change for its creative and innovative possibilities, eliminating fear and working as a team to find solutions that work.

We offer two interactives working programs with senior executives leading an organizational redesign. A seven-day (7 x 1) program and a twelve-day (3 x 4) program. Both programs takes participants beyond the design phase to build an effective, nimble organization that can respond to the challenges of the 21st century.

What Is It?

A learning program to understand and redesign your organization

Drawing on recent "JRC" research and extensive organization design practice, these working programs lets CEO-level executives explore the latest theories and best practices of agile organization design. Participants are encouraged to go beyond the traditional matrix to ready their companies for the challenges, the pace, and the complexity of the future.

LEARNING GOALS

How can organizations use their strengths to become better companies? Ours flagship programs for organizations combines interactive workshop-based learning with fieldwork and peer coaching, providing a rare opportunity for tomorrow companies:
